ANNOUNCEMENT

Tanzania Heart Institute Hospital is celebrating seven years of providing health services since its establishment in May, 2002.

While we are celebrating our successes, the Institute for the second time has been given the honor to host the 6th African Heart Seminar which will take place this year in November 2009.

The seminar will bring together experts in Cardiovascular Disease Management from different African Countries and other parts of the World.

Also, during these events two books written by the Founder of the Institute would be launched about Heart Disease one in Swahili and another in English languages.

Thanks to our supporters and well-wishers.

**WE WELCOME YOU ALL TO JOIN US DURING
THESE EVENTS**
